Our team has participated in over 300 Tiki Wiki CMS Groupware projects since 2002. Here is a partial list of clients showing the large diversity of projects.

Name of client	Description of project
Groupe Dynamite is a women's clothing chain, managing the Dynamite and Garage brands.	Groupe Dynamite has been using Tiki since 2009. Tiki provides the main bilingual intranet for the 6000 employees of the head office and the 500 stores of the group. The intranet contains documentation, store procedures and Tiki trackers for management of various databases (which replaced the use of Microsoft Excel) http://www.jobboom.com/carriere/l-informatique-dans-les-nuages-change-les-habitudes/
Language Technologies Research Centre (LTRC, www.ltrc.ca)	Linguistech.ca is a reference website for the 1500 members of the community of language professionals.
L'Institut national d'excellence en santé et en services sociaux (INESSS) (formerly AETMIS).	The 150 employees have used Tiki as an intranet since 2006. The mission of the institute is to promote clinical excellence and the efficient use of the resources in the health and social services sector. INESSS is a body composed of health and social services professionals, researchers, clinicians and managers, all driven by the pursuit of clinical excellence on behalf of the Québec population.
Natural Sciences and Engineering Research Council of Canada	Team intranet
City of Brossard	Team intranet

Pacific Northwest National Laboratory (PNNL), a laboratory of the United States Department of Energy	Visual Analytics Community (vacommunity.org) is a home for visual analytics discussions and for emerging communities of related research and practice.
American National Standards Institute (ANSI)	Consulting, training, development and support using Tiki trackers as internal databases.
LabàLab	Labàlab is a community of practice for artist-run centers, media labs, research-creation centers and artists.
