Task

18.x: Fatal error when attempting to view history of a deleted tracker item

Add a timesheet

[Add a timesheet for this task](#)

Description

<https://avan.tech/item33107> was deleting, and then visiting history will do:

```
Fatal error: Uncaught Error: Call to a member function getConfiguration() on boolean in  
/var/www/html/lib/core/Tracker/Item.php:200 Stack trace: #0  
/var/www/html/lib/core/Tracker/Item.php(88): Tracker_Item->canSeeOwn() #1 /var/www/html/tiki-  
tracker_view_history.php(23): Tracker_Item->canView() #2 {main} thrown in  
/var/www/html/lib/core/Tracker/Item.php on line 200
```

Comments

Fixed but a new error raises

[Serge Kishiko](#) 2019-08-07 17:07

I've fixed the error. For the record, ``\$this->definition`` was null from which ``getConfiguration()`` function was called. Find out the code here

https://gitlab.com/tikiwiki/tiki/merge_requests/146.

But the fix displays an SQL syntax error as shown on this image

<https://avan.tech/dl5341>.

Trying to fix it...

Fixed, too

[Serge Kishiko](#) 2019-08-07 18:01

As we're working on a deleted item, some params are null.

Especially those in where clause. Now an error message is shown instead of the raw PHP fatal error.

This commit has been queued on this MR

https://gitlab.com/tikiwiki/tiki/merge_requests/146

@Serge

Marc Laporte 2019-09-06 04:10

You fixed in 18.x, which is great. Thank you.

But it's still broken in 20.x:

[tiki-tracker_view_history.php?itemId=33107](https://dev.tiki.org/wiki/view_history.php?itemId=33107)

Please see: <https://dev.tiki.org/Where-to-commit>

Moving to Loic

Marc Laporte 2019-10-23 07:31

Because Serge never answered.

Fixed in 20.x

Loïc Yabili 2019-10-25 11:20

I created a merge request https://gitlab.com/tikiwiki/tiki/merge_requests/186 to solve the problem on 20.x based on the changes in @Serge while not modifying the changes in 20.x.

I notice that there is the same problem in the main master branch, can I also make changes on it?

Not needed

Marc Laporte 2019-10-25 15:10

It should happen as part of normal process:

<https://dev.tiki.org/Semi-automatic-merging-period>

Understood

Loïc Yabili 2019-10-29 03:59

That's interesting, thank you.

This has been merged

Loïc Yabili 2019-11-26 03:47

Merge request https://gitlab.com/tikiwiki/tiki/merge_requests/186 has been merged in 20.x

ok, so please let the community test / react for 3 weeks

Marc Laporte 2019-11-26 06:37

If no issues are reported, please make a merge request for 18.x

Thanks!

Ok @Marc

Loïc Yabili 2019-11-28 05:19

But i think this has already been fixed in the 18.x branch

https://gitlab.com/tikiwiki/tiki/merge_requests/146
