Comments

@marclaporte

emmanuel.masikilizano 2023-04-28 04:00

I tried to reproduce the bug by following BeytoA's procedure without success.
Maybe he should be more specific!

ok, he added more details

Marc Laporte 2023-04-28 07:36

The bug exists

emmanuel.masikilizano 2023-04-28 15:16

I finally reproduced the bug. Just restart the server before installing a virtual server on it to reproduce the bug

Thank you

Marc Laporte 2023-04-30 17:55

Please try to fix. If you don't think you can, we'll escalate.

Boss and Emmanuel will work together. It seems to be linked to a recent enhancement

Fixed

boss.brahim 2023-05-02 06:21

https://gitlab.com/wikisuite/virtualmin-tikimanager/-/merge_requests/13

Works

horia.negura 2023-05-02 11:14

On dev4, we get the Tiki manager once again in Virtualmin.

All the machines now

horia.negura 2023-05-02 11:39

Updated all the servers, update went fine.

Analysis

Marc Laporte 2023-05-02 12:09

Because we don't have [item89286-Daily-build-for-wikisuite-packages](#), the bug took weeks to manifest itself

Also

Marc Laporte 2023-05-02 12:36

Boss didn't have an easy way to test because we lack [item91206-Add-a-way-to-test-WikiSuite-packages-before-they-are-deployed-on-packages-wikisuite-org](#)
