They are not supposed to be reported in both places. It's probably related to something in <span style="background-color: yellow">https://gitlab.com/tikiwiki/tiki/-/merge_requests/3163</span> , but I have no clue what just by inspection. Could be error handler registration delay (unlikely), handler returning true when it used to return false (almost certainly, but why and where?), or smarty not unregistering handlers properly. And what's different about themes.tiki.org, I can't reproduce the problem locally.

## Also at doc.t.o
<span style="background-color: yellow">gary.cunningham-lee</span> 2023-07-11 12:03

The error is also here: <span style="background-color: yellow">https://doc.tiki.org/PluginLayout</span>

## Comment for edit #6
